

ANNUAL AWARDS

Recognizing Leaders in the Farm Building Sector of the Canadian Construction Industry

The **Canadian Farm Builders Association - Annual Conference** was held in Stratford ON, January 26th, 2018. A highlight of the event is the Awards program that **recognizes leaders in the farm building sector of the Canadian construction industry** in each of nine categories, with an additional 'Project of the Year' Award for the best overall entry. This was a very exciting year for CFBA members - with more entries than they've seen in recent years. Entries are voted on by attendees @ the annual conference in a 'People's Choice' voting format for the 'Best Entry in Category'.

HFH Inc. won the best overall - Project of the Year for their entry in the Dairy category, while there was also excitement surrounding a three-way tie for the Award in the **Horse II category**, with Dutch Masters, Gara Farm Buildings, and HFH Inc. all receiving an Award in this category! The Horse I and Horse II categories are based on the building cost for the completed projects. Horse I is for projects up to \$750,000, while Horse II is for projects with a value over \$750,000.

For more information about the Canadian Farm Builders Association, or additional photos of these award winning projects, please visit www.cfba.ca.
