

Calhoun Super Structure Completes Production Plant Expansion, Offering Increased Energy Efficiency and New Local Jobs

Goderich, Ontario – May 11, 2022 – Calhoun Super Structure is taking the business’ engineering capabilities to the next level, with its newly completed 10,000-square-foot production plant expansion in Goderich, Ont., Canada. The fabric-covered building manufacturer invested approximately \$1 million in the expansion, which broke ground last July.

The new addition allows Calhoun to add about 40% more jobs across material handlers, welders and office staff. This energy-efficient facility includes LED lighting and sustainable welding machines to streamline manufacturing operations, increase eco-friendly business practices and keep up with rising customer demands.

“Calhoun is a family-owned business committed to delivering top-quality, innovative fabric building solutions to customers. From initial concept discussions to project completion, we look forward to the opportunities this expansion will bring to the business and our customers,” said Dan Dalzell, Director of Sales and Operations.

To celebrate the completed expansion, Calhoun will host a public open house event on June 9 at 5 p.m. EST for the local and surrounding community. Attendees will have the opportunity to tour the new plant and enjoy live music from Owen Sound band, The Little Bigheads. A food truck will also be on-site, and Calhoun will offer guests an exclusive customer discount for attending the event.

Calhoun specializes in designing, engineering and manufacturing innovative fabric structures throughout North America. The business has advanced expertise in developing agricultural structures, sand and salt storage, warehousing facilities, fertilizer storage and more.

“We’re not only excited about the capabilities this expansion brings our company, but also the positive impact it has on the Goderich community, including new jobs. We’re celebrating 30 years of business this year, and the expansion will allow us to manufacture reliable building solutions for many more years to come,” said Jeremy Calhoun, Chief Executive Officer and Owner.

To commemorate its 30th anniversary, Calhoun is implementing various activities throughout the year, including an ongoing 30:30 Cancer [Fundraiser](#) – aiming to raise \$30,000 for the Canadian Cancer Society. This effort honors Eloise Calhoun, a key contributor to the company’s founding, who passed away in March 2004 due to breast cancer.

The company that began by selling 30-by-70-foot fabric structures for agricultural storage has now installed over 9,000 diverse projects worldwide, with over 36 dealers in North America. From Calhoun’s strong dealer network to its production plant expansion, the business will leverage the last 30 years of manufacturing expertise to deliver quality, novel structures.

###

About Calhoun Super Structure: Calhoun Super Structure has been an industry leader in fabric structures in North America for 30 years. Each Calhoun structure is engineered to meet the highest quality standards and is fully customizable to a variety of industries and uses. With building profiles ranging in size from 16’ wide to 250’ wide, and supported by an authorized dealer network, Calhoun’s highly trained engineers and designers produce the safest, most reliable series of structures on the market. Calhoun values the strength of your structure, longevity of your investment and an extended warranty. Visit calhounsuperstructure.com for more information.
